FINLAND. NON-INSPECTION ACTIVITIES

Title of the non-inspection activity: Chemical factors

Duration of the non-inspection activity: 1.3.2020 – 31.12.2023

Aim of the non-inspection activity: At workplaces, employees are exposed to chemical exposures that are harmful to your health. We monitor, guide and instruct workplaces so that occupational diseases and work-related diseases caused by harmful exposure are reduced. The non-inspection activity was part of an inspection project. The project was implemented as workplace inspections. If necessary, the project was also be implemented as hybrid inspections (meeting via Teams and a separate workplace tour). In addition, the project included communicating about chemical factors through other channels. The goal described above was reached by ensuring, in particular, the preparation of a risk assessment of chemical factors and the legal implementation of the protection measures identified and defined therein.

Scope of the non-inspection activity (description): The non-inspection activity included webinar on risk assessment of chemical agents, online publications on different themes, direct messages to companies by email and social media publications on different themes.

Sector covered by the non-inspection activity: Companies using chemical agents in work.

The number of establishments covered by the non-inspection activity: The webinar had 700 participants (1,330 registered and some have viewed afterwards). The number of direct messages to companies by email varied between 1,000 and 2,200 recipients and their opening percentage varied between 34 % and 44 %. Online publications are available to everyone on our agency's website. Social media publications were made on various topics on Facebook, Instagaram and LinkedIn.

The number of labour inspectors involved in implementing the non-inspection activity: 6 persons

The number of specialised staff (but not labour inspectors) involved in implementing the non-inspection activity: **3 persons**

The number of persons involved in supervising the implementation of the non-inspection activity (including the preparation of communication and promotional materials and summing up its results): 5 persons

Background of the non-inspection activity: Part of an inspection project

Budget of the non-inspection activity: The non-inspection activity had no separate budget, it was included in the appropriation for OSH administration communications.

Short summary of the outcome of the non-inspection activity: A good number of participants (700 people) attended the webinar and the webinar received good feedback. More webinars on the topic were hoped for. The webinar, direct messages, online publications and social media

messages achieved a large number of employers and employees that would not have been achieved through inspection activities, compared to the resources used. The aim of non-inspection activities was to reach and communicate on topical issues those actors that implement occupational safety measures on their own initiative, while the aim is to target inspection activities at those actors that need to be monitored.

No.	question	yes/no	comment		
	Non-i	inspectio	n activity		
A. Stakeholders cooperating with the labour inspectorate in non-inspection activity					
1.	1. Were external stakeholders involved in the implementation of the non-inspection activity:				
a)	From the public sector?	NO			
b)	From the private sector?	NO			
2.	Does your national legislation specify	NO			
	the rules of cooperation with				
	stakeholders in non-inspection				
	activity?				
3.	While selecting stakeholders for	NO			
	cooperation during the non-				
	inspection activity, was any account				
	taken of the results of the				
	inspectorate's cooperation with such				
4	stakeholders during previous				
	initiatives?				
B. Sc	ources of project financing in the labo	ur inspec	torate's activity		
4.	Was the project (of non-inspection	YES			
	activity) financed solely by the labour				
	inspectorate?				
C. Pr	reparation of the project (of non-inspe	ection act	ivity)		
5.	What sources were used to specify		Please choose from the following (it is possible		
	the described non-inspection		to choose more than one answer):		
	activity?		external database of occupational diseases		
			(please specify)		
			 ASA notification register 		
			(notification on use of carcinogenic		
			substances)		
			proposals of partner institutions (which		
			ones?)		
			- The Finnish Institute of		
			Occupational Health requested that		
			information on reporting to the ASA		

			vesistav be previded duving the
			register be provided during the
			campaign.
			proposals of stakeholders – employer
			organizations
			proposals of stakeholders – trade union
			organizations, others (which ones?)
			Employer and employee organisations and
			The Finnish Institute of Occupational
			Health expressed a general wish for
			communication related to chemical agents,
			not a particular wish for a specific matter.
	Y The second sec		others (please specify)
			Information observed during enforcement
			and legislative amendments.
6.	How was the project (of non-inspection	n activity)	prepared?
a)	By an organisational unit of the	NO	
	labour inspectorate		
b)	By a group/team established ad hoc	YES	Who were the members of the group?
	to implement the project		A representative from each of the 5 aerial
			OSH inspectorates
			Who verified consistency of the implemented
			project with the approved plans?
			The group, heads of the OSH inspectorates,
			on strategic level Ministry of Social Affairs
			and Health
c)	By an external entity (e.g. another	NO	
	public authority or a private		
	enterprise)		
7.	enterprise) Was the project (of non-inspection	YES	What was the title of the inspection task?
7.		YES	What was the title of the inspection task? Chemical factors
7.	Was the project (of non-inspection	YES	
7.	Was the project (of non-inspection	YES	Chemical factors
7.	Was the project (of non-inspection	YES	Chemical factors What was the scope of the inspection task?
7.	Was the project (of non-inspection	YES	Chemical factors What was the scope of the inspection task? See the Questionnaire

8. During which phase was the inspection task launched? Somments: Inspection and non-inspection activity.				See the Questionnaire
Inspection and non-inspection activities were planned as a whole and implemented simultaneously.	8.	During which phase was the		during the non-inspection activity,
What components were included in the plan of actions (of non-inspection activity)?		inspection task launched?		Comments:
Simultaneously.				Inspection and non-inspection activities
9. What components were included in the plan of actions (of non-inspection activity)? 10. How was the target group of the non-inspection activity specified? 11. In the plan of the non-inspection activity. 12. Were IT tools used to identify the priority area in the described non-inspection project? 13. What components were included in the plan of activity the priority area in the described non-inspection activity activity. 14. What components were included in the plan of the non-inspection activity specified? 15. Were IT tools used to identify the priority area in the described non-inspection project? 16. Were IT tools used to identify the priority area in the described non-inspection project? 17. 	the non-inspection activity.		
F. Ev	aluation of the non-inspection activity	y. Method	ds and tools used to evaluate non-inspection
initia	atives.		
19.	Were the project results evaluated?	YES	What indicators were used for evaluation?
			Customer feedback was collected on the
			webinar. We asked the following questions:
			I intend to share the information I
			have received at the webinar with
			others. (How likely, 1-5)
			The webinar will influence how I
			will act in the future. (How
			different, 1-5).
			In addition, we estimated the resources
			used in relation to the time spent and we
			estimated how many more workplaces we
			reach through non-inspection activities
			than inspections.
20.	How were the project results evaluated	17	than dispections.
a)	Was any final summary evaluation of	NO	
a)	the non-inspection activity made?	INO	
b)	Were partial assessments made	YES	What was the frequency of partial
D)	during the non-inspection activity?	153	assessments?
	during the non-inspection activity:		The assessment was always carried out
			after the non-inspection activity had been taken.
			What was the scope of partial assessments?
			Numerical data were collected extensively.
			The verbal evaluation was carried out

			limited. More broadly, on the Webinars, see
			the question 19.
c)	Did you prepare a formal document	NO	
	with evaluation of the promotional		
	campaign after its completion?		
21.	Were the effects of the non-	YES	See the question 19.
	inspection activity evaluated?		
22.	What tools and methods were used to	evaluate t	he effects of the non-inspection activity?
a)	Evaluation by labour inspectors	NO	
	during inspection of establishments		
	covered by the promotional		
	campaign.		
b)	Checklists filled out by	NO	
	establishments covered by the
